

# Weld-Ex 95 FIRE CONTROL SYSTEM

Every year fires start...

...causing major damage and personal injury as a result of the mig welding process.

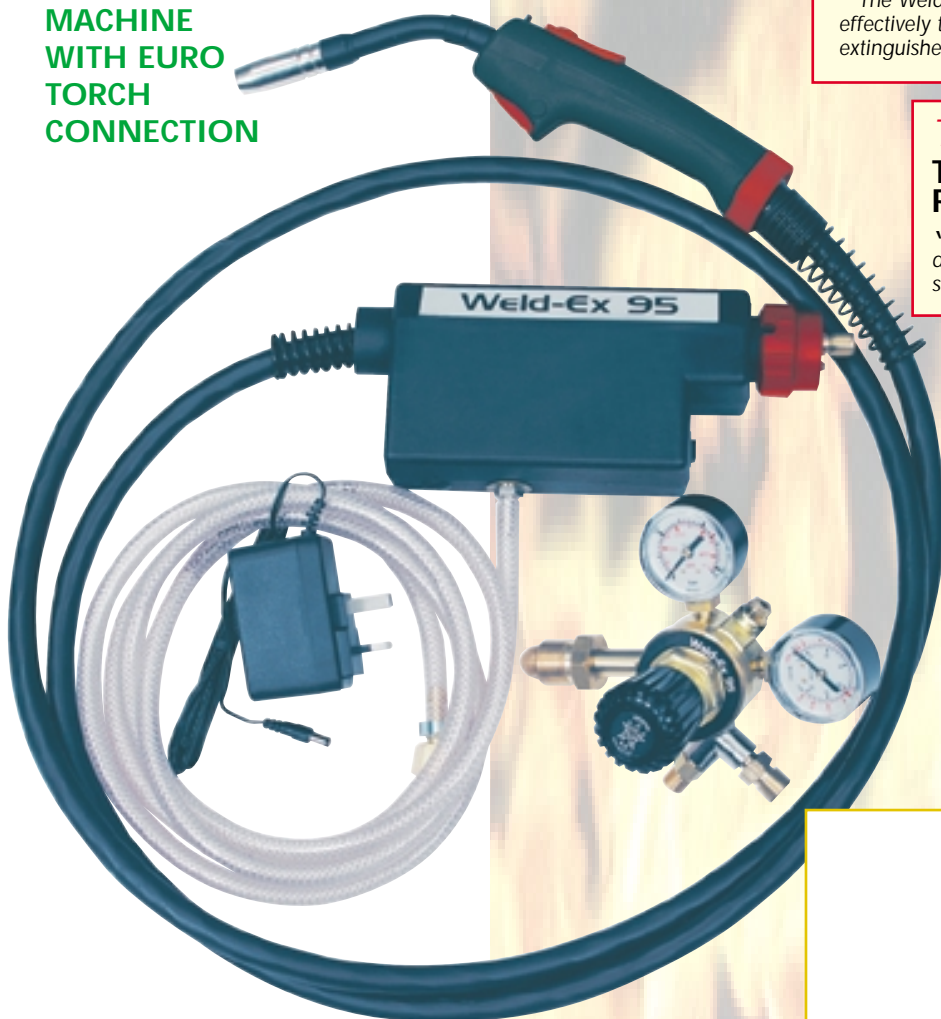

Even fires effectively controlled by foam, powder or water extinguishers require expensive clean up time after being discharged onto a vehicle.

## THE SOLUTION!

# Weld-Ex 95

### RETRO-FIT KIT

FITS ANY MACHINE WITH EURO TORCH CONNECTION

## THE PROBLEM!

### MVRA

#### Motor Vehicle Repairers Association

"...anyone who uses mig welding equipment will be aware, flash fires can and do occur and do get out of control quite quickly.

Obviously no-one who is welding, no matter what type of welder they are using, should be doing it without a fire extinguisher readily available. Conventional extinguishers in bodyshops and mechanical shops are mainly water, gas, foam and powder, all of which will extinguish a fire but, other than gas, will leave a mess or cause further damage.

The Weldex 95 System is an attachment to the mig welder that effectively turns the welder into an instant fire extinguisher without the use of water, foam or powder ' .

### THATCHAM

#### The Motor Insurance Repair Research Centre

" It is an extremely simple and effective fire fighting device which will give an immediate fire fighting capability should a fire occur ' .

## MIG WELDING TORCH

Rating: 150 Amps @ 60% Duty Cycle  
Mixed Gases - Wire Size 0.6 to 1.0 mm

#### KIT INCLUDES

- ◆ WELDEX 95 EURO CONNECTION MIG WELDING TORCH
- ◆ WELDEX 95 GAS REGULATOR - UK
- ◆ CONNECTION HOSE
- ◆ LOW VOLTAGE POWER SUPPLY - UK
- ◆ FITS ANY MACHINE WITH EURO CONNECTION SOCKET

Distributor

# Weld-Ex 95 FIRE CONTROL SYSTEM

When you are mig welding,  
due to the heat & sparks  
there is always the risk of fire!

The Weldex 95 is a vital tool to assist the control of fire.  
It works by using the shielding gas as a medium to  
extinguish the fire.

By activating the button at the rear of the torch the gas  
flow is increased by 10 times that used in the welding  
process and because the argon/co2 is the medium  
used to extinguish the fire no residue is left over.

Therefore no time  
is needed for  
cleaning and  
provided it is  
safe to do so  
welding can be  
resumed almost  
immediately.

## ◆ Gold Medal Winner!

(Tools/Machine Class)

Eureka Worldwide  
Innovations  
Exhibition in  
Brussels

## ◆ Gold Medal Trophy!

Specially presented by the  
Hungarian Patent Office for  
the most imaginative invention
